GUIDE MANUAL

HEALTH • LEISURE • AMUSEMENT

FUNCTIONS

JUMPER is operated mainly by a spring control upon actuation, so the result is a straight movement relative to the ground. With JUMPER's functional principle, compressed spring characteristic and backward movement of the force point during actuation are achieved. This supports the natural force point movement in the heels direction at higher loads and allows the runner to transpose his optimal jumping energy.

JUMPER is a part of future entertainment. The ability to jump 6 to 7 feet high in the air and run with incredible speed while leaping and bouncing is a sight never seen before in the entertainment world. Especially, for kids, it can be helpful to speed up growing progress without trouble to the joints. Enjoy incredible heights and speed with your JUMPER.

Be sure to observe the following to ensure safety

Read the guide manual thoroughly before playing and follow the instructions contained therein.

- 1) The instruction manual contains warnings and caution instructions on playing and handling the product you purchase. These instructions should always be followed to prevent you or others from any injury.
- 2) After reading this guide manual, keep it nearby or in a safe place where it can be easily accessed for future reference.

HEALTH · LEISURE · AMUSEMENT

1. Description (Mainbody, wrench for adjusting level, Guide Manual)

(1) Mainbody

- ① Calf wrap w/foam knee bar
- ② Plastic foot part
- ③ Rubber sole part
- ④ Spring

(2) Wrench for adjusting level.

2. How to play JUMPER

(1) Where to play JUMPER

- ① Be sure to play JUMPER on a flat and hard place.
- ② Play it on a large, safe ground to avoid falling down on nearby obstacles.

Prohibited Places to play on

- ◇ Car path: It is difficult to stop or turn while racing or driving. Playing JUMPER near roads or paths is not advisable.
- ◇ Soft places such as lawn, carpeted areas: Spring malfunctions on soft places can cause a risk of falling down, if you lose your balance.
- ◇ Slope, alley, stairs: Jumping is not advisable on these narrow and sloped places. You can also fall down or run against others.

HEALTH · LEISURE · AMUSEMENT

(2) Application

① Preparation

Prepare 1 pair of JUMPER on both sides (feet or legs).
Put on comfortable clothes and sneakers.
Put on all protective accessories.

MODEL FOR TEENAGER

MODEL FOR ADULT

② Preparation for running

Adjusting the calf-wraps and knee bars
The foam knee bars should be touching the base of the knee caps. To adjust the knee bars, slightly loosen the allen screws located in the plastic collar that has the calf-wrap attached. The bars will slide up or down in the collar. It is usually not necessary to move the collar. If the collar is moved make sure it is straight when tightening the screws. Tighten the screws firmly but do not over tighten them. The strap behind the knees does not have to be very tight. This adjustment will give the best stability and ease of use.
After adjusting calf-wrap and knee bar

③ Before using, You have to check following points.

◆ **Tight fit of bolt connections.**

Plastic collar for fixing the foam knee-bar.

◆ **General directions**

All bolt connections (except bolt connections at the plastic collar) are secured with special liquid to prevent from disconnecting. If the special liquid is not applied properly, contact (with) out customer service center.

HEALTH • LEISURE • AMUSEMENT

- 1) start with the webbing behind my calf.
- 2) Then cross over the bar ...
- 3) Then wrap behind the knee and repeat.
- 4) The webbing straps just tie off in the back, so they aren't bouncing around visibly.
- 5) Here's one of the black straps, on my right knee. It's a shorter strap, so it only goes around once, and I put the buckle just beyond the very front of my knee so I don't risk landing directly on it. Then good to go.

◆ **Special Notice for Kid's**

- 1、 First Step: Put on JUMPER on a high seat and an adult should make a child stand in front of him or her.
- 2、 An adult should help a child to walk step by step with taking him/her by both hands. He/She walks softly outstretching his/her feet.
- 3、 It is impossible to keep up standing without walking. A child should move or walk to keep his/her balance again and again.
- 4、 It can be dangerous if a child exercises alone from the beginning.

◆ **Standing up after a fall-down.**

Normally, a beginner cannot stand up after a fall-down without any help. Therefore you should not try the first step without a friend. If you are more confident about the equipment you can stand up without assistance by kneeling on one leg and standing up by putting the weight on the other leg.

⑤ **Take off.**

- 1) Sit on a high seat such as a barstool.
- 2) Take off from JUMPER pushing toward palm using thumb.

HEALTH • LEISURE • AMUSEMENT

3. Caution

- (1) User should wear not only helmet but protective guards on knees, palms and elbows.
- (2) Walk step by step and practice steadily. A beginner should not jump up randomly.
- (3) Enjoy it for the right duration based on your physical state or exercise experience. Adjust exercise time accordingly.

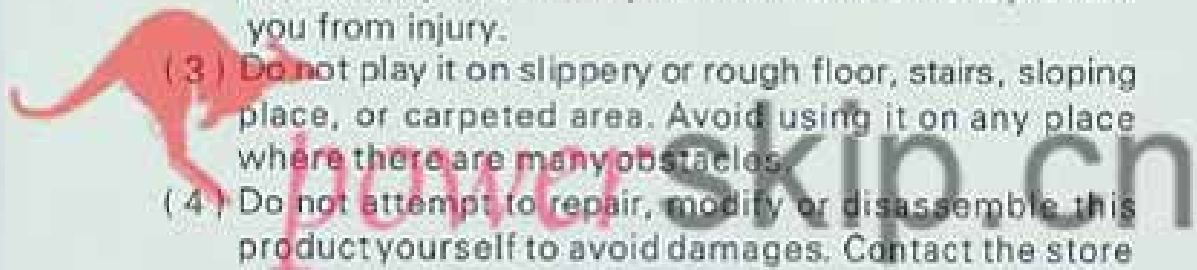

For your safety...

JUMPER is a high-quality product strictly designed to be lightweight. To avoid injuries, it is necessary to always keep the equipment in good condition.

4. For your safety (Most Important)

! Warning

- (1) Do not play JUMPER, when you have fracture, bruise, abnormal body condition, or a person who cannot enjoy any sport activity due to dull motor sensation.
- (2) Do not play JUMPER without sufficient warmup exercise. Walk slowly for an adequate amount of time to prevent you from injury.
- (3) Do not play it on slippery or rough floor, stairs, sloping place, or carpeted area. Avoid using it on any place where there are many obstacles.
- (4) Do not attempt to repair, modify or disassemble this product yourself to avoid damages. Contact the store where you purchased it or any our customer service center.
- (5) Remove dirt or dust after playing. Clean wet parts using a dry cloth to prevent rust.

HEALTH · LEISURE · AMUSEMENT

- (6) Neither producer nor distributor will be responsible for and claims from each user caused by miss-use or accidental injury.

5、 Service and cleaning.

- (1) Any damage to JUMPER must be repaired before re-use after thorough consideration of safety instructions.
- (2) Repair work should only be done by an authorized representative or by an expert we designated.
- (3) Use only dry cloth to clean JUMPER.
- (4) It is important to make sure no sharp edges damage the springs surface. Avoid scraping off dirt.

6、 Product Warranty

This product comes with a free 1-year warranty effective excluding spring on the date of purchase. Damage caused by natural wear and tear, as well as damage due to improper use is excluded from the warranty.
